PROFESSIONAL SUMMARY

Results-driven Software Engineer with full-stack experience in React, Node.js, and C, and a proven track record of delivering real-world projects. Led development of a car rental platform and gained strong system-level expertise through the ALX Software Engineering Program. DEPI graduate, eager to contribute to scalable and impactful software solutions.

TECHNICAL SKILLS

Languages | JavaScript (ES6+), TypeScript, Python, C, C++

Frontend | ReactJS, NextJS, Tailwind CSS, Bootstrap, Redux, Framer Motion

Backend & Tools | Node.js, Express.js, MongoDB, JWT, REST APIs, Git & GitHub, CLI, AI

Soft Skills | Team Leadership, Agile Collaboration, Time Management, Critical Thinking, Adaptability

EXPERIENCE

Digital Egypt Pioneers Initiative (DEPI)

07/2025 – 01/2026

React Frontend Web Developer – Software Development Track

- Developed frontend applications using React, TypeScript, JavaScript, HTML5, and CSS3 with focus on performance and accessibility.
- Completed intensive training covering backend development (Node.js, Express.js), version control (Git/GitHub), UI/UX, testing, and Docker containerization.
- Capstone project: Built a full-stack web application from design through deployment using Agile collaboration practices.

ALX Software Engineering Scholarship

11/2023 – 08/2024

Software Engineer Trainee

- Built a strong foundation in low-level programming including data structures, algorithms, C programming, memory management, and shell scripting.
- Gained hands-on experience with Git, Linux/Unix environments, and collaborative development through pair programming and code reviews.

PROJECTS

ByDrive – Car Rental Management System | React, Node.js, Express.js, MongoDB, Tailwind CSS [GitHub](#) | [Live Demo](#)

- Led a team of 4 developers as Team Lead, overseeing task distribution, code reviews, and on-time delivery of a full-stack car rental platform.
- Architected a dual-role system with customer and admin interfaces, featuring real-time availability, secure JWT authentication, and booking management.
- Implemented a review and rating system with eligibility validation, moderation controls, and a business analytics dashboard for administrators.

printf – Custom C Standard Library Implementation | C, Linux/Unix

[GitHub](#)

- Implemented a fully functional printf() clone in C supporting 16+ format specifiers including integers, floats, strings, pointers, binary, octal, and hexadecimal.
- Engineered flag support ($\pm$, space, #, 0, -) and length modifiers (h, l) with optimized buffer management for precise output formatting.
- Built custom specifiers including secure string printing, string reversal, and ROT13 encoding using variadic functions and memory management.

COURSES

- Udemy – Build Responsive Real-World Websites with HTML and CSS
- Udemy – The Complete JavaScript Course 2024: From Zero to Expert!
- Udemy – The Ultimate React Course 2025: React, Next.js, Redux & More

EDUCATION

- Alexandria Higher Institute of Engineering and Technology (AIET) 2022 – 2027
- Bachelor of Computer Engineering
