PROFESSIONAL SUMMARY

Computer Engineering student (graduating 2027) building full-stack web applications with Angular, React, Node.js, and FastAPI. Sole frontend engineer on Medora, a multi-tenant clinic SaaS built by an 11-member graduation team, and Team Lead of 4 developers on ByDrive, named one of the best projects in the DEPI program. Completed Angular training at ITI and a web development internship at Beeviro. Seeking a frontend or full-stack internship or junior role.

EDUCATION

Bachelor of Computer Engineering 2022 – 2027 (Expected)

Alexandria Higher Institute of Engineering and Technology (AIET), Alexandria, Egypt | GPA: 3.0 / 4.0

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C, HTML5, CSS3

Frontend: Angular, NgRx Signals, PrimeNG, React, Tailwind CSS, Server-Side Rendering (SSR), Accessibility (WCAG AA)

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, SQLAlchemy, Alembic

Databases: PostgreSQL, MongoDB

Tools & Practices: Git, GitHub, Docker, pytest, Linux/Unix, Shell Scripting, ClickUp, Agile, Code Reviews

EXPERIENCE

Web Development Intern – Angular 08/2026 – 09/2026

Information Technology Institute (ITI)

- Studied TypeScript, Angular component architecture, routing, services, and REST API integration in an intensive web development program.
- Developed modular Angular features with reusable components, form validation, and asynchronous HTTP client communication.

Web Developer Intern 04/2026 – 06/2026

Beeviro | Remote

- Contributed to multiple web projects as a member of the web team in a large development organization.
- Delivered tasks assigned by the team lead through ClickUp, tracking each item from assignment to completion.
- Coordinated daily updates and handoffs with developers and leads in a virtual office.

React Frontend Web Developer – Software Development Track 07/2025 – 01/2026

Digital Egypt Pioneers Initiative (DEPI)

- Trained in React, TypeScript, Node.js, Express.js, Git/GitHub, testing, and Docker, with a focus on performance and accessibility.
- Delivered ByDrive, a full-stack capstone built with Agile practices, which was named one of the best projects in the training.

Software Engineer Trainee 11/2023 – 08/2024

ALX Software Engineering Scholarship

- Built a foundation in C, data structures, algorithms, memory management, and shell scripting.
- Practiced Git and Linux/Unix workflows through pair programming and peer code reviews.

PROJECTS

Medora – Clinic Management Platform (Graduation Project) | *Angular, TypeScript, NgRx Signals, PrimeNG, Tailwind CSS*

- Architect the frontend of a multi-tenant clinic SaaS as sole frontend engineer, including slug-based clinic workspaces and a system admin dashboard.
- Implement admin and staff authentication (OTP, account recovery, forced password rotation) and tenant-aware routing.
- Design an accessible (WCAG AA) atomic-design form system on Angular 21 with SSR, backed by an Express mock API.

Buguard ASM API – Attack Surface Management | *FastAPI, PostgreSQL, Docker, pytest* GitHub

- Built a REST API with CRUD endpoints, bulk import with deduplication, and asset lifecycle tracking.
- Added an asset relationships graph, API key authentication, Alembic migrations, pytest coverage, and Docker setup.

ByDrive – Car Rental Management System | *React, Node.js, Express.js, MongoDB, Tailwind CSS* GitHub | Live Demo

- Led a team of 4 developers as Team Lead, overseeing task distribution, code reviews, and delivery.
- Built customer and admin interfaces with real-time availability, JWT auth, bookings, reviews, and analytics.

printf – Custom C Standard Library Implementation | *C, Linux/Unix* GitHub

- Implemented a printf() clone in C supporting 16+ format specifiers, flags, and length modifiers.

CERTIFICATIONS & LANGUAGES

Certifications: DEPI React Frontend Web Developer | ITI Angular Web Development | Beeviro Web Developer Internship

Languages: Arabic (Native) | English (Professional)
